You may not rely on the filtering system of the Classes section of the Architecture website for a course to be counted as a specific discipline MArch elective. If a class is identified as counting towards a Restricted Elective for a particular discipline, it may instead be used count towards the Non-Restricted Elective in the same discipline.

This list of pre-approved electives will be posted in the upper right-hand corner of the [Classes](#) section of the website after the winter break. This is the list of courses that have been reviewed and approved as counting towards specific discipline requirements. Course numbers outside the normal list of subjects are reviewed each semester, so taking one of these course numbers a different term does not automatically mean it was approved towards a specific discipline requirement.
